Measures Used

2 x 2 Contingency Table

Observations \ Forecasts			
	A	B	C = A +B
	D	E	F = D + E
	G = A + D	H = B + E	I = C + F

- **Chi-Square** – used to test for statistical significance. Answers the question, “Do we have a large enough sample to know our results are conclusive?”.
- **Heidke Skill Score** – used to test whether we are beating persistence or climatology.
- **Bias** – used to determine whether we are over-forecasting or under-forecasting.

Review

- **HWD** – Strong Skill overall: Increased skill in HWD from last month and increased significantly from Sep 03. Perfect score on bias: We are not over forecasting nor under forecasting HWD.

- **TSTMS** – Strong Skill overall: No significant change from last month and only slightly less skill than Sep 03. We continue to over forecast TSTMS.
